### **DETAILED ACTION**

Claims 17-22, 28 and 29 are currently pending in the instant application and are subject to the following restriction requirement.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 17-22, drawn to a process for preparing the product of the formula IVa classified in class 548.

*(\*Note: Claim 17 is dependent on cancelled claim 1 and should be amended to include the information required from cancelled claim 1.)*

- II. Claim 28 drawn to products of the formula IV classified in class 548.
- III. Claim 29 drawn to products of the formula Va classified in class 548.

Inventions I, II and III are independent and distinct inventions as inventions II and III are products which differ materially in structure and composition from one another, for example, the product of invention III contains three heterocycles whereas the products of invention II only contain 2 heterocycles. Furthermore, the process of invention I prepares the product of the formula IVa, not IV or Va. The product of the formula IVa differs materially in structure and composition from the products of inventions II and III.

Because these inventions are distinct for the reasons given above and the search required for one Group is not required for another Group, restriction for examination purposes as indicated is proper.

Art Unit: 1626

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
